- Bank reconciliation statements
- Depreciation calculations

Scenario and Application Questions

These test the ability to apply accounting principles to real-world situations:

- Analysis of financial statements
- Interpretation of ratios
- Handling of errors and their correction
- Decision-making based on financial data

Sample Questions and Model Answers from ZIMSEC Past Papers

Example 1: Theoretical Question

Question: Explain the concept of the going concern assumption in accounting. (4 marks)

Answer:

The going concern assumption presumes that a business will continue to operate for the foreseeable future and has no intention or necessity to liquidate or significantly reduce its operations. This assumption allows accountants to defer the recognition of certain expenses and to value assets based on their continued use rather than their liquidation value. It is fundamental in preparing financial statements, as it influences the valuation of assets and liabilities, ensuring that the reports reflect the ongoing nature of the business.

Example 2: Practical Calculation

Question: Prepare the trial balance of ABC Traders as at 31st December 2023, from the following ledger balances:

- Cash at bank: \$10,000
- Accounts receivable: \$5,000
- Accounts payable: \$3,000
- Capital account: \$15,000
- Purchases: \$8,000
- Sales: \$20,000
- Expenses: \$2,000

Note: All balances are in debit unless specified otherwise.

Answer:

| Account | Debit (\$) | Credit (\$) |

|-----|-----|-----|

| Cash at bank | 10,000 | |

| Accounts receivable | 5,000 | |

| Purchases | 8,000 | |

| Expenses | 2,000 | |

| Capital | | 15,000 |

| Accounts payable | | 3,000 |

| Sales | | 20,000 |

| Total | 25,000 | 38,000 |

Note: The trial balance totals do not balance because the missing figure is the owner's drawings or other adjusting entries. In practice, ensure all balances are included, and adjustments are made to balance the trial balance.

Example 3: Scenario-Based Question

Question: A company discovered an error in recording a purchase of supplies amounting to \$500. The purchase was mistakenly debited to supplies expense, but it should have been capitalized as an asset. How should this error be corrected in the financial statements?

Answer:

To correct the error, an adjusting journal entry should be made:

- Debit Supplies (Asset account) by \$500 to recognize the supplies as an asset.
- Credit Expenses (Supplies expense) by \$500 to reverse the incorrect recording.

This adjustment increases the asset value on the balance sheet and decreases expenses on the income statement, thus providing a more accurate reflection of the company's financial position.
