A Brief History of Covered Bridges

Covered bridges date back to the 19th century, primarily built in North America during a time when transportation infrastructure was rapidly expanding. The primary purpose of covering these bridges was to protect the wooden structural elements from weather and decay, significantly extending their lifespan. Without a roof and sides, wooden bridges would succumb to rot and deterioration within a few years; with covering, some bridges have lasted over a century.

Key historical facts:

- Most covered bridges were constructed between 1820 and 1900.
- They are predominantly built using truss designs such as Town, Burr, or Howe trusses.
- The covering also served as a shelter for travelers during inclement weather.

Why Are Covered Bridges Still Celebrated Today?

Despite their age, many covered bridges are still standing, maintained either as active crossings or preserved as historic landmarks. Their nostalgic appeal, craftsmanship, and scenic surroundings make them popular subjects for photographers, tourists, and preservationists.
