Tom has 3 boxes. One contains only apples, one contains only oranges, and one contains both apples and oranges. The boxes are incorrectly labeled. If you can pick only one fruit from one box to correctly label all boxes, how can you do it?

Solution:

- Pick one fruit from the box labeled "Mixed."
- Since the label is wrong, this box does not contain both fruits. It must contain only apples or only oranges.
- If you pick an apple from this box, then:
 - The box labeled "Oranges" cannot contain only oranges (since labels are wrong), so it must contain both fruits.
 - The remaining box, labeled "Apples," must contain only oranges.

This process allows you to correctly label all boxes with just one pick.

Answer: By drawing one fruit from the box labeled "Mixed" and using the process of elimination.

The Structure and Content of NMOS 2014

The Examination Format

NMOS 2014 maintained a rigorous structure designed to challenge students' mathematical thinking:

- Paper 1 (Multiple Choice): Approximately 20 questions, each with four options. This segment tested quick thinking and foundational skills.
- Paper 2 (Open-Ended): Around 5 to 6 questions requiring detailed, step-by-step solutions. These problems often integrated concepts from algebra, geometry, number theory, and combinatorics.

This format ensured an assessment of both speed and depth of understanding. The open-ended questions, in particular, demanded creative problem-solving techniques, often involving multiple approaches and insightful insights.

Sample Problems from NMOS 2014

While the complete set of problems remains proprietary, some representative examples from NMOS 2014 include:

- Geometry: "In triangle ABC, if $AB = AC$, and the angle BAC is 60° , find the measure of angle ABC."
- Number Theory: "Find all integers n for which $n^2 + 3n + 2$ is a perfect square."
- Algebra: "Solve for x in the equation $2^x + 2^{\{x+1\}} = 60$."
- Combinatorics: "In how many ways can 5 different books be arranged on a shelf if two specific books must not be adjacent?"

These problems exemplify the blend of logical reasoning and mathematical knowledge required in NMOS 2014.

The Challenges and Skills Tested

NMOS 2014, like previous editions, aimed to push students beyond traditional school mathematics. The problems often required:

- Deep understanding of concepts: Students needed to internalize mathematical principles to apply them in unfamiliar contexts.
- Creative problem-solving: Many questions had multiple pathways to a solution, encouraging innovative approaches.
- Logical reasoning: The ability to analyze complex problems, identify key steps, and construct rigorous arguments was crucial.
- Time management: Balancing speed with accuracy was essential, especially given the limited time per paper.

The competition's design ensures that success is not solely about memorizing formulas but about cultivating a mathematical mindset—an attribute vital for future scientific pursuits.

Preparation and Training for NMOS 2014

Preparing for NMOS 2014 involved a comprehensive approach combining individual effort, coaching, and exposure to challenging problems:
