A7: The American Society of Mechanical Engineers (ASME) and the National Fire Protection

Association (NFPA), particularly NFPA 85, which covers boiler and combustion systems.

Q8: What is the purpose of a boiler logbook?

A8: To record operational data, maintenance activities, safety inspections, and any anomalies, ensuring compliance with regulations and aiding in troubleshooting.

Troubleshooting Scenarios

Q9: If a boiler is producing insufficient steam, what are two possible causes?

A9:

- Scale buildup reducing heat transfer efficiency
- Insufficient fuel supply or burner malfunction

Q10: What should be the immediate response if a pressure relief valve continuously leaks?

A10: The boiler should be shut down, the relief valve inspected and replaced if necessary, and the root cause of the leak identified before restarting.
